

# The Climate Change Performance Index 2013

## A comparison of the 58 top CO<sub>2</sub> emitting nations

The Climate Change Performance Index is an instrument supposed to enhance transparency in international climate politics. Its aim is to encourage political and social pressure on those countries which have, up to now, failed to take ambitious actions on climate protection as well as to highlight countries with best-practice climate policies. On the basis of standardised criteria, the index evaluates and compares the climate protection performance of 58 countries that are, together, responsible for more than 90 percent of global energy-related CO<sub>2</sub> emissions. 80 percent of the evaluation is based on objective indicators of emissions trend and emissions level. 20 percent of the index results are built upon national and international climate policy assessments by more than 200 experts from the respective countries.

### Please note:

Climate Change Performance Index 2013 was published 2012 during COP 18 in Doha.

Climate Change Performance Index 2014 will be published on Monday, 18 November 2013, 10:30 am CET!

### Author

Jan Burck, Lukas Hermwille, Laura Krings

### ISBN

978-3-943704-06-8

### Order Number

13-2-02e

### Number of Pages

20

### Nominal Charge

5.00 EUR (only when submitting an order)

### Publication Date

12/2012
